

Subject Index to Volume 15

A

- A5 cell group, L-glutamate stimulation, cardiovascular effects, H44
- Acetylcholine, vagal effects, heart rate, H585
- Acidosis
metabolic, myocardial pH during ischemia, H652
myocardial, transmural pH gradient, H232
respiratory, myocardial pH during ischemia, H652
- Action potentials: *see* Potentials
- Adenosine
aminophylline effects, cremaster arterioles, H592
postcontraction hyperemia and, gracilis muscle, H274
protein phosphorylation and, heart, H559
transporter, cardiac membranes (guinea pig), H710
- Adenosine monophosphate, cyclic norepinephrine effects, myocardium, H31
protein kinase inhibitor effects and, calcium channel blockade, heart cells (chick), H630
relaxation, arterial smooth muscle, H306
sustained aortic constriction and, neonate and adult, H197
- Adenosine triphosphatase, contractile protein, postnatal development, heart, H332
- Adenosine triphosphate, synthesis, hypoxanthine or inosine, after myocardial ischemia, H37
- Adenylyl cyclase
norepinephrine effects, myocardium, H31
sustained aortic constriction and, neonate and adult, H197
- Adrenal gland, insufficiency, vasoconstrictors in, H104
- Adrenergic function, regional differences, left ventricle, H824
- α -Adrenergic system, blood pressure maintenance and, H25
- Afterload, stroke volume, beat-to-beat determinants, H435
- Aging, excitation-contraction coupling, cardiac muscle, H784
- Albumin
serum
capillary filtration coefficient, hindlimb, H818
macromolecule transport, tissue, H129
- Alkalosis, myocardial, transmural pH gradient, H252
- Alprenolol, norepinephrine release and, cardiac, H283
- Aminophylline, exercise dilation and, cremaster arterioles, H592
- Amplifiers, thermocouple, H626
- Androgen, mechanisms, exercise-induced cardiac hypertrophy, H761
- Anesthesia
arterial microcirculation, vasomotion in (hamster), H508
carotid sinus baroreflex and, H696
endotoxin, venous responsiveness and, hepatic, H658
pressure-flow relations, renal arterial, H702
- Angina pectoris, intracardiac bradykinin and, H500
- Angiotensin converting-enzyme, inhibition, blood pressure regulation and, H143
- Angiotensin II
baroreflex control, heart rate and sympathetic activity, H80
cerebral cortical, blood pressure maintenance and, H25
cerebrospinal fluid collection, cisterna magna, awake state, H551
contraction, arterial smooth muscle, H306
endotoxin and, hepatic venous responsiveness, anesthesia, H658
infusion
reversal of Goldblatt hypertension, H811
vascular angiotensin II receptors and, H608
vascular effects, adrenal insufficiency, H104
- Anoxia
capillary filtration coefficient and, isolated hindlimb, H312
working gracilis muscle, H120
- Antibodies, fragments, blood pressure regulation and, H404
- Antimuscarinic agents, excess tachycardia after, awake state, H168
- Aorta
banding, coronary, collateral, and perfusion territory responses, H768
constriction, cyclic nucleotide response, neonate and adult, H197
diameter, blood volume effects, awake state, H579
membrane fluxes, adenosine monophosphate, cyclic-dependent reduction, H306
- Aortic arch, smooth muscle tone changes and, H1
- Aortic impedance: *see* Impedance
- Aortic nerve
rapid resetting, awake state, H302
thiamylal effects, carotid occlusion and mild hemorrhage, H806
- Aortic stenosis
experimental, H296
subvalvular pressure gradients, H542
- Arachidonic acid, metabolism, ductus arteriosus (lamb), H640
- Arginine vasopressin: *see* Vasopressin
- Arterial pressure: *see* Pressure
- Arterial wall, electrolytes, chronic smoking effects, H97
- Arteries, mechanics, cigarette smoking effects, H97
- Arterioles
cerebellar and cerebral, comparison, changes in carbon dioxide pressure, H386
cremaster, aminophylline effects on exercise dilation, H592
- diameter
microcirculation and (hamster), H508
renal hypertension and, H728
penetrating, norepinephrine effects, cerebral cortex, H380
- Ascorbic acid, dilution, cardiac output measurement and, adult and newborn (dog, piglet), H733
- Atria, inotropic response, isoproterenol and, H369
- Atrioventricular conduction, sinoatrial rate and, baroreceptor control of, H149
- Atropine
excess tachycardia after, awake state, H168
parasympathetic control, heart rate, H838
- Autonomic nervous system
parasympathetic control, heart rate, H838
vagal stimulation, heart rate, H585
- Autoregulation, cerebral cortical, arterial and microvascular contributions, H17
- Awake state
aortic baroreflex, sustained interruption, H319
aortic impedance, circulating blood volume effects, H579
aortic nerves, rapid resetting, H302
cerebrospinal fluid collection, cisterna magna catheter, H551
contractility measurement, myocardial, H293
epinephrine infusion, pressor effects, H683
excess tachycardia, atropine and, H168
His bundle recordings, improved method, H876
renal vasoconstriction, during hemorrhagic hypotension, H671
vasoactive intestinal peptides, pulmonary vascular effects, newborn (lamb), H716

B

- Bacteremia, gram-negative, cardiopulmonary response to, H344
- Baroreflex: *see* Reflexes
- Blockade
 β_2 , hemorrhage, cardiac performance and, H351
adenosine, exercise dilation and, cremaster arterioles, H592
 α -adrenergic, renal arterial pressure-flow relations, anesthesia, H702
 β -adrenergic, norepinephrine release and, heart, H283
 α_1 -adrenoceptor, renal hypertension and, H573
slow channel, myocardial, protein kinase inhibitor (chick), H630
- Blood, intracardiac velocity, aortic stenosis, H542
- Blood flow: *see also* Circulation; Microcirculation
arterial and venous, cessation of, capacitance effects (pig), H525
circumflex artery occlusion, transmural changes in heart (dog, pig), H601

Blood flow—continued

- coronary, cardiac hypertrophy, H374
- mesenteric and renal, leukotriene effects, H518
- muscle
 - exercise after training, H59
 - hindlimb, swimming, H398
- myocardial
 - radiolabeled microspheres, H418
 - regional, following coronary occlusion (monkey), H635
 - organ, radiolabeled microspheres, H418
 - regional, A5 cell stimulation, H44
 - renal, vasoconstriction during hemorrhagic hypotension, awake state, H671
 - skin, normal hydration, vasopressin effects, H143
 - superior mesenteric, plasma arginine vasopressin and, H168
 - thermodilution measurement, limitations of, H754
 - uterine, exercise effects, pregnancy (goat), H207
- Blood pressure: *see also* Pressure
 - A5 cell stimulation and, H44
 - arterial, sustained interruption of aortic baroreflex, H319
 - baroreflex control, hypertension, H843
 - epinephrine infusion and, awake state, H683
 - maintenance, angiotensin II, α -adrenergic system, and arginine vasopressin effects, H25
 - mean arterial, plasma arginine vasopressin and, H168
 - pulsus alternans, H245
 - regulation
 - renin-specific IgG and antibody fragments, H404
 - vasoconstrictors, H104
 - swimming, hindlimb muscles, H398
 - vasopressin effects, normal hydration, H143
- Blood volume: *see also* Volume
 - acute expansion, baroreflex regulation of vascular resistance, H74
 - circulating, aortic impedance and, awake state, H579
 - regulation, osmolality-plasma vasopressin relations, H360
- Bradykinin, intracardiac, spinoreticular and spinohthalamic cell responses to, H500
- Brain, autoregulation, arterial and microvascular contributions, H17

C

- Calcium
 - current, cardiac hypertrophy, H675
 - high, diet, oxygen pressure deficiency and, H324
 - influx, sodium effects, cardiac muscle, H222
 - protein phosphorylation and, heart, H559
- Calcium channels, blockade, protein kinase effects, heart cells (chick), H630
- Calcium paradox, sodium effects, unstimulated cardiac muscle, H222
- Capacitance
 - vascular, skeletal muscle, H880
 - venous, limb, renin-angiotensin system effects, H239
- Capillaries
 - density, propranolol and epinephrine effects, heart, H189
 - filtration coefficient: *see* Filtration coefficient
 - fluid exchange: *see* Fluid
 - pressure: *see* Pressure
 - proliferation, heart, spontaneous hypertension, H739
- Capillary bed, macromolecule transport, H129
- Captopril
 - limb circulation, renin-angiotensin system and, H239
 - renal hypertension, renin level and, H573
- Carbohydrates, oxidation, heart cells, neonate, H389
- Carbon dioxide
 - pressure, cerebellar and cerebral arteriole responses, H386
 - tension, myocardial, during ischemia, H652
- Carbon monoxide, ductus arteriosus (lamb), H640
- Cardiac membranes, adenosine transporter, photoaffinity labeling of (guinea pig), H710
- Cardiac output
 - A5 cell stimulation and, H44
 - β -adrenergic vascular control, hemorrhage, H351
 - exercise, after training, H59
 - gram-negative bacteremia and, H344
 - measurement, ascorbic acid dilution, adult and newborn (dog, piglet), H733
 - thermocouple amplifiers, H626
 - thermodilution measurements, limitation of, H754
- Cardiomyopathy, congestive, norepinephrine effects, myocardium, H31
- Cardiopulmonary response, gram-negative bacteremia, H344
- Cardiovascular regulation, A5 cell stimulation and, H44
- Carotid artery
 - bilateral occlusion, left cervical vagotomy, H319
 - occlusion
 - anesthesia and, H702
 - mild hemorrhage and, thiamylal effects, H806
- Catecholamines
 - adrenergic function, left ventricle, H824
 - mechanisms, cardiac hypertrophy, H675
 - plasma, renal hypertension, H573
 - protein phosphorylation and, heart, H559
 - β -receptors and adenylate cyclase, myocardium, H31
 - uterine blood flow, exercise and, pregnancy (goat), H207
- Cathepsin D, plasma, circulatory homeostasis during hemorrhagic shock, H168
- Catheter manometer system, contractility measurement, myocardial, H293
- Caudal medulla, reticular formation, intracardiac bradykinin and, H500
- Cellularity, heart, nutrition effects, H332
- Central nervous system
 - mediation, arterial baroreflex, renal hypertension and, H720

- occlusive summation, renal nerve activity, H851
- Cerebellum, arteriole response, carbon dioxide pressure changes, H386
- Cerebral cortex
 - autoregulation, arterial and microvascular contributions, H17
 - penetrating arterioles, norepinephrine effects, H380
- Cerebrospinal fluid, collection, cisterna magna, awake state, H551
- Cerebrum, circulation: *see* Circulation
- Chloralose, anesthesia, carotid sinus reflex and, H696
- Cineradiography, biplane, positive end-expiratory pressure, left ventricle, H792
- Circulation: *see also* Blood flow; Microcirculation
 - cerebral, reactive hyperemia, H52
 - coronary
 - aortic banding and, H768
 - control, preload effects, H410
 - left ventricular receptors and, H664
 - platelet-activating factor and (pig), H466
 - gastrointestinal, exercise after training, H59
 - homeostasis, hemorrhagic shock, plasma arginine vasopressin and, H168
 - limb, renin-angiotensin system effects, H239
- Circulation-metabolism coupling: *see* Coupling
- Circulatory shock: *see* Shock
- Cisterna magna, cerebrospinal fluid collection, awake state, H551
- Citrate synthetase, activity, heart, H483
- Clearance, reticuloendothelial, depressed, platelets, after trauma, H180
- Coenzyme A, synthesis, heart, H532
- Compliance, arterial and venous flow, capacitance and (pig), H525
- Computed tomography, left ventricular myocardial mass, H138
- Computer studies, digital, cardiac output, adult and newborn (dog, piglet), H733
- Connective tissue, composition, chronic smoking effects, H97
- Contraction: *see* Muscle; Muscle, heart
- Coronary artery
 - circumflex occlusion, transmural changes in heart (dog, pig), H601
 - instrumentation, cardiac adrenergic innervation, H459
 - occlusion
 - capillary density, propranolol and epinephrine effects, H189
 - regional myocardial blood flow and necrosis following (monkey), H635
 - transmural DC electrograms (pig), H475
- Corticosterone, cardiac hypertrophy, exercise-induced, H761
- Coupling
 - circulation-metabolism, working gracilis muscle, H120
 - excitation-contraction
 - aging effects, cardiac muscle, H784
 - cardiac hypertrophy, H675
 - developing heart, H615
 - ventricular mechanical restitution, H8
- Current, slow inward, cardiac hypertrophy, H675

Cysteine, coenzyme A synthesis and, heart, H532
 Cytoskeleton, myocardial, molecular analysis, H566

D

Dehydromonocrotaline, pulmonary hypertension, thrombocytopenia effects, H747
 Deoxycorticosterone, infusion, vascular angiotensin II receptors and, H608
 Deoxycorticosterone acetate, hypertension, baroreflex sensitivity, H448
 Desmethylinipramine, norepinephrine release and, cardiac, H283
 Development, myocardial mechanical function, subcellular organelles and, H615
 Dexamethasone, cardiac hypertrophy, exercise-induced, H761
 Dextran, macromolecule transport, tissue, H129
 Diabetes, gradient insulin therapy, cardiac function and, H453
 Diet: *see* Feeding
 5 α -Dihydrotestosterone, cardiac hypertrophy, exercise-induced, H761
 Dipyridamole
 adenosine transporters, cardiac membrane (guinea pig), H710
 exercise hyperemia, gracilis muscle, H274
 DOC: *see* Deoxycorticosterone
 DOCA: *see* Deoxycorticosterone acetate
 Dose-response relations, chronic cigarette smoking, arteries, H97
 Ductus arteriosus, monooxygenase, cytochrome P₄₅₀-linked (lamb), H450

E

Ear chamber, macromolecule transport, tissue, H129
 Edema, pulmonary, histamine and propranolol effects, H69
 Electrograms, direct current, coronary artery occlusion and latex embolization (pig), H475
 Electrophysiology
 cardiac, slow channel blockade by protein kinase inhibitor (chick), H630
 His bundle recording, awake state, H876
 Embolization
 coronary
 latex, direct current electrograms (pig), H475
 radiolabeled microspheres, H418
 Endotoxin, venous responsiveness, hepatic, anesthesia and, H658
 Enzymes: *see also* specific enzyme activity, heart, H483
 metabolic, postnatal development, heart, H332
 Epinephrine
 adrenergic function, left ventricle, H824
 capillary density and, heart, H189
 infusion, pressor effects, awake state, H683
 Erythrocytes, water permeability and, hindlimb, H818
 Excitation-contraction coupling: *see* Coupling
 Exercise
 blood flow patterns, after training, muscle, H59

cardiac hypertrophy, androgen and glucocorticoid mechanisms in, H761
 dilation, aminophylline effects, cremaster arterioles, H592
 hyperemia: *see* Hyperemia
 isotonic, uptake of exogenous substrates and, H690
 swimming, blood flow distribution patterns, hindlimb muscle, H398
 training, blood flow patterns, muscle, H59
 uterine blood flow and, pregnancy (goat), H207

F

Feeding
 diet, isoproterenol, cardiac and aortic smooth muscle reactivity, H369
 oral calcium supplementation, oxygen pressure deficiency, H324
 Fetus: *see also* Pregnancy
 cardiac Purkinje fibers, electrophysiology and ultrastructure, H250
 growth, exercise effects on uterine blood flow (goat), H207
 myocardial mechanical function, developmental changes, H615
 premature heart, ouabain effects, H213
 Filtration coefficient
 capillary
 anoxia and, isolated hindlimb, H312
 plasma and red blood cell effects, hindlimb, H818
 Fluid, capillary, exchange, skeletal muscle, H880
 Fluorimetry, laser, nicotinamide adenine dinucleotide, H491
 Force, calcium-dependent, sodium effects, cardiac muscle, H222
 Force development, chronic smoking effects, arteries, H97
 Force-interval relations, cardiac, ventricular mechanical restitution, H8
 Forskolol, arterial smooth muscle, adenosine monophosphate, cyclic-induced relaxation, H306

G

Gap junction: *see* Junctions
 Glucocorticoid, mechanisms, exercise-induced cardiac hypertrophy, H761
 L-Glutamate, stimulation, A5 cell group, cardiovascular effects, H44
 Glutamic dehydrogenase, activity, heart, H483
 Glutamine, metabolism, heart, H267
 Glutamine synthetase, metabolism, heart, H267
 Glycolysis, working gracilis muscle, H120
 Glycocyrrholate, excess tachycardia and, awake state, H168
 Glycosides, cardiac, premature fetal heart, H213
 Gracilis muscle
 postcontraction hyperemia, adenosine effects, H274
 working, lactate accumulation in, H120
 Guanosine monophosphate, cyclic, sustained aortic constriction and, neonate and adult, H197
 Guanosine triphosphate, synthesis, hypoxanthine or inosine, after myocardial ischemia, H37

Guanylate cyclase, sustained aortic constriction and, neonate and adult, H197

H

Heart
 adenosine transporter, photoaffinity labeling (guinea pig), H710
 adrenergic function, catecholamines and, H824
 adrenergic system, coronary instrumentation and, H459
 capillary density, propranolol and epinephrine effects, H189
 coenzyme A synthesis, pantothenate kinase and, H532
 cyclic nucleotide response, sustained aortic constriction and, neonate and adult, H197
 diffusion, heterogeneity of, striated muscles (hamster), H161
 failure, slow response action potentials, hypertrophied myocardium, H675
 function
 calcium ion metabolism, developmental changes, H615
 gradient insulin therapy, diabetes, H453
 gap junctional proteins, components of, H865
 glutamic dehydrogenase activity, H483
 glutamine metabolism, H267
 hypertrophy: *see* Hypertrophy
 ischemic, regulation of pyruvate dehydrogenase complex, H858
 mechanical restitution, ventricular, H8
 mechanics, oxygen consumption and pressure-volume area, abnormal contractions, H154
 muscle: *see* Muscle, heart
 neural control, awake state, H168
 norepinephrine release, β -adrenergic blockade effects, H283
 pain, intracardiac bradykinin and, H500
 performance, β -adrenergic vascular control in hemorrhage, H351
 perfused, NADH laser fluorimetry, H491
 postnatal development, nutritional modification of, H332
 premature, ouabain effects, fetus, H213
 protein phosphorylation, adenosine and calcium effects, H559
 Purkinje fibers: *see* Purkinje fibers
 receptors: *see* Receptors
 spontaneous hypertension, structural compensatory mechanisms, H739
 transmural changes, circumflex artery occlusion (dog, pig), H601
 vagal regulation of, H149
 working, gram-negative bacteremia, H344
 Heart cells: *see also* Muscle cells, heart
 carbohydrate and palmitate oxidation, neonate, H389
 protein kinase inhibitor, myocardial slow channel blockade (chick), H630
 Heart-lung interaction, positive end-expiratory pressure, H114
 Heart rate
 aortic baroreflex
 blood flow distribution and, hindlimb muscles, swimming, H398
 sustained interruption, H319
 baroreceptor reflex, reversal, renal hypertension, H261

Heart rate—*continued*

- baroreflex control, angiotensin and, H80
- central mediation, renal hypertension effects, H720
- intrinsic, atropine and, awake state, H168
- parasympathetic control, noninvasive, H838
- pulsus alternans, postextrasystolic, H245
- vagal stimulation effects, sinoatrial node, H585

Heart ventricles

- arrhythmias, coronary artery occlusion (pig), H475
- function, stroke volume, H435
- hypertrophy: *see* Hypertrophy
- premature depolarization, pulsus alternans, H245
- response, positive end-expiratory pressure, H114

Heart ventricles, left

- adrenergic function, H824
- coronary vasodilation, ouabain-induced, H664
- diastolic pressure, preload effects, H410
- dimensional analysis, during positive end-expiratory pressure, H792
- mass, myocardial, dynamic spatial reconstructor, H138
- mechanical restitution, H8
- oxygen consumption, abnormal contractions and, H154
- pressure
 - aortic stenosis, H542
 - cyclic nucleotides, neonate and adult, H197
- transmural changes, circumflex artery occlusion (dog, pig), H601

Heart ventricles, right

- hypertrophy: *see* Hypertrophy
- systolic performance, pulmonary vascular resistance effects, H339

Hemodynamics, cardiac output, thermodynamic measurements, limitations of, H754

Hemorrhage

- β -adrenergic vascular control, cardiac performance and, H351
- carotid occlusion and, thiamylal effects on response, H806
- renal vasoconstriction during, awake state, H671

Hemorrhagic shock: *see* Shock

Heterogeneity, oxygen diffusion, skeletal muscle (hamster), H161

His bundle, recordings, improved method, awake state, H876

Histamine, propranolol and, extravascular lung water, H69

Hydration, normal, vasopressin effects on blood pressure, H143

6-Hydroxydopamine, cardiovascular effects, A5 cell stimulation and, H44

Hydroxyl radical, myocardial alterations, H776

Hypercalcemia, oxygen pressure deficiency and, H324

Hypercapnia

- arterioles, cerebellar and cerebral, H386
- renal vasoconstriction, during hemorrhagic hypotension, awake state, H671

Hyperemia

- adenosine and exercise dilation, aminophylline effects, H592

exercise, adenosine effects, gracilis muscle, H274

postcontraction, adenosine effects, gracilis muscle, H274

reactive, cerebral circulation, H52

Hyperosmolality, vasopressin, cardiac receptors and, H360

Hypertension

arterial

- cisterna magna catheter, awake state, H551
- renal, α_1 -adrenoceptor blockade, H573
- DOCA-salt, baroreflex sensitivity, H448
- Goldblatt, reversal by angiotensin II infusion, H811
- pulmonary, thrombocytopenia effects, H747

renal

- central mediation of arterial baroreflex in, H720
- microvascular alterations in, H728
- reversal of baroreceptor reflexes, H261
- renal nerves, baroreflex control, H843
- spontaneous
 - cardiac hypertrophy in, H739
 - high-calcium diet effects, H324

Hypertrophy

cardiac

- exercise-induced, androgen and glucocorticoid mechanisms in, H761
- oxygen supply-consumption balance, hypoxia, H374
- slow response action potentials, H675
- spontaneous hypertension, H739
- coronary and collateral circulation, aortic banding, H768
- myocardial, norepinephrine effects, H31
- right ventricular, thrombocytopenia and, H747

ventricular

- experimental aortic stenosis, H296
- slow response action potentials, H675
- Hypocapnia, arterioles, cerebellar and cerebral, H386
- Hypotension, hemorrhagic, renal vasoconstriction and, awake state, H671
- Hypoxanthine, purine salvage, myocardial ischemia, H37

I

Images, three-dimensional, left ventricular myocardial mass, H138

Immunoglobulin G, renin-specific, blood pressure regulation and, H404

Impedance

aortic

- circulating blood volume effects, awake state, H579
- smooth muscle changes and, H1
- Indicator-dilution studies
 - multiple, cardiac norepinephrine release, H283
- thermocouple amplifiers, H626

Indomethacin, coronary circulation, platelet-activating factor and (pig), H466

Infant: *see* Neonate; Newborn

Infarction, myocardial, blood flow and necrosis (monkey), H635

Inosine, purine salvage, myocardial ischemia, H37

Instrumentation, coronary artery, cardiac adrenergic system after, H459

Insulin, gradient therapy, diabetes, heart function and, H453

Ischemia

- cardiac, regulation of pyruvate dehydro-

genase complex, H858

- cerebral, reactive hyperemia, H52
- circumflex artery occlusion and, transmural changes in heart (dog, pig), H601
- myocardial
 - accelerated purine salvage, H37
 - following coronary occlusion (monkey), H635
 - transmural DC electrograms (pig), H475
 - transmural pH gradient, H232
 - pH decrease, myocardium, H652
- renal, Goldblatt hypertension, H811
- Isoenzymes, myosin, diabetes, heart function and, H453
- Isoproterenol, cardiac and aortic smooth muscle, diet effects, H369

J

- Junctions, gap, cardiac, components of, H865

K

Kidney

- arterial pressure-flow relations, anesthesia and, H702
- blood flow: *see* Blood flow
- hypertension: *see* Hypertension
- ischemic, removal, renovascular hypertension, H811
- vascular bed: *see* Vascular bed
- vasoconstriction: *see* Vasoconstriction
- Kinase, myosin light chain, arterial smooth muscle, H306

L

Lactate, accumulation, working gracilis muscle, H120

Latex, embolization, coronary artery, transmural DC electrograms (pig), H475

Leukotrienes, blood flow and, mesenteric and renal, H518

Lipids, metabolism, heart cells, neonate, H389

Liver

- platelets, depressed reticuloendothelial clearance, after trauma, H180
- venous responsiveness, after endotoxin, anesthesia and, H658
- Lung, extravascular water, propranolol and histamine effects, H69
- Lung-heart interactions, positive end-expiratory pressure, left ventricle, H792

M

Macromolecules, transport, capillary bed, H129

Membrane, flux, adenosine monophosphate, cyclic-dependent, arterial smooth muscle, H306

Membrane channels, heart, components of, H865

Mesenteric artery, angiotensin II receptors, regulation of, H608

Metabolic acidosis: *see* Acidosis

Methionine sulfoximine analogues, glutamine metabolism, heart, H267

Methoxamine, reversal of renal hypertension, baroreceptor heart rate reflex, H261

Methyltrienolone, cardiac hypertrophy, exercise-induced, H761

- Microcirculation: *see also* Blood flow;
Circulation
aminophylline effects, adenosine and exercise dilation, H592
arterial, arterial microcirculation and (hamster), H508
cerebral, carbon dioxide pressure and, H386
muscle, exercise after training, H59
myocardial, epinephrine and propranolol effects, H189
norepinephrine effects, cerebral cortex, H380
- Microembolization, depressed reticuloendothelial clearance, platelets, after trauma, H180
- Microspheres
blood flow distribution, hindlimb muscles, swimming, H398
cerebral circulation, reactive hyperemia, H52
exogenous substrate uptake, graded muscle stimulation and, H690
radiolabeled
A5 cell stimulation, cardiovascular effects, H44
myocardial blood flow measurements, H418
renal vasoconstriction, during hemorrhagic hypotension, awake state, H671
- Microvessels, cerebral cortical, autoregulation, H17
- Mineralocorticoids, vascular angiotensin II receptors and, H608
- Models
baroreflex control, sinoatrial rate and atrioventricular conduction, H149
macromolecule transport, tissue, H129
mathematical, stroke volume, beat-to-beat determinants, H435
norepinephrine release, cardiac, H283
telemetric experiments, coronary artery instrumentation, H459
- Modulus, dynamic, viscoelasticity, pulmonary arteries, H90
- Monoaminergic innervation, heart, coronary artery instrumentation, H459
- Monocrotaline pyrrole, pulmonary hypertension, thrombocytopenia effects, H747
- Monooxygenase cytochrome P₄₅₀-linked, myocardial, ductus arteriosus and (lamb), H640
- Muscle
blood flow: *see* Blood flow
graded stimulation, exogenous substrates and, H690
lactate accumulation, H120
striated, oxygen diffusion through (hamster), H161
- Muscle, heart
abnormal contractions, oxygen consumption and abnormal contractions, H154
androgen receptors in, exercise-induced hypertrophy, H761
contractile function, nutritional modification, H332
contractility, catecholamines and, H559
contraction, duration, aging effects, H784
excitation-contraction coupling, aging effects, H784
unstimulated, sodium effects on calcium-dependent force, H222
- Muscle, skeletal
adenosine and exercise dilation, aminophylline effects, H592
capillary pressure, estimating, H880
oxygen diffusion coefficients (hamster), H161
- Muscle, smooth
aortic, impedance and, awake state, H579
arterial, adenosine monophosphate, cyclic-induced relaxation, H306
cardiac and aortic, isoproterenol effects, diet and, H369
tone, changes, aortic impedance and, H1
vascular, norepinephrine effects, cerebral cortex, H380
viscoelasticity, pulmonary, H90
- Muscle cells, heart: *see also* Heart cells
cyclic nucleotides, neonate and adult, H197
- Muscle fiber, types, blood flow distribution, hindlimb, H398
- Myocardial depressant factor, hemorrhagic shock, plasma arginine vasopressin and, H168
- Myocardial fibers, density, propranolol and epinephrine effects, H189
- Myocardium
accelerated purine salvage, ischemia, H37
alterations, free-radical generation, H776
blood flow: *see* Blood flow
contractility
measurement, awake state, H293
ventricular mechanical restitution, H8
hypertrophied, slow response action potentials, H675
left ventricular, mass, dynamic spatial reconstructor, H138
mechanical function
sodium pump and, ouabain effects, fetus, H213
subcellular organelles and, development, H615
pH decrease, ischemia-induced, H652
protein phosphorylation, adenosine and calcium effects, H559
 β -receptors and adenylate cyclase, norepinephrine effects, H31
- Myoglobin, saturation, working gracilis muscle, H120
- N**
- Nagarse, enzyme activity, heart, H483
- Neonate: *see also* Newborn
heart cells, carbohydrate and palmitate oxidation, H389
heart cyclic nucleotides, sustained aortic constriction and, H197
- Nerves: *see also* specific type and site
recording, conscious, H302
- Neuropeptides, cerebrospinal fluid collection, cisterna magna catheter, awake state, H551
- Neurotransmitters, cerebrospinal fluid collection, cisterna magna, H551
- Newborn: *see also* Neonate
cardiac output measurement, ascorbic acid dilution (dog, piglet), H733
myocardial mechanical function, developmental changes, H615
vascular volume, polycythemia effects, H830
vasoactive intestinal peptides, pulmonary vascular effects, awake state (lamb), H716
- Nicotinamide adenine dinucleotide, laser fluorimetry, H491
- Nitrobenzylthioinosine, photoaffinity labeling, adenosine transporter, cardiac membranes (guinea pig), H710
- Nitroglycerin
renal nerve activity, H851
reversal of renal hypertension, baroreceptor heart rate reflex, H261
- Norepinephrine
adrenergic function, left ventricle, H824
blood pressure maintenance and, H25
cerebrospinal fluid collection, cisterna magna, awake state, H551
chronic smoking, arteries, H97
contraction, arterial smooth muscle, H306
endotoxin and, hepatic venous responsiveness, anesthesia, H658
infusion, reversal of Goldblatt hypertension, H811
penetrating arterioles and, cerebral cortex, H380
pressor effects, awake state, H683
 β -receptors and adenylate cyclase, myocardium, H31
release, β -adrenergic blockade and, heart, H283
renin-angiotensin system, limb circulation and, H239
vascular effects, adrenal insufficiency, H104
- Nucleoside, accelerated purine salvage, myocardial, H37
- Nucleotides
biosynthesis, accelerated purine salvage, myocardial, H37
requirements, enzyme activity, heart, H483
- Nucleotides, cyclic, heart, sustained aortic constriction and, neonate and adult, H197
- Nutrition, heart, postnatal development, H332
- O**
- Ontogenesis, cardiac Purkinje fibers, fetal, H250
- Organelles, subcellular, myocardial mechanical function and, development, H615
- Osmolality-vasopressin relations, cardiac receptor influences on, H360
- Ouabain
premature heart, fetus, H213
reflex coronary vasodilation, cardiac receptors, H664
- Oxidation, carbohydrates and palmitate, heart cells, neonatal, H389
- Oxidative metabolism, coenzyme A synthesis and, heart, H532
- Oxygen
consumption
myocardial, hypertrophy, H374
pressure-volume area and, abnormal contractions, heart, H154
monooxygenase and, ductus arteriosus (lamb), H640
pressure, deficiency, high-calcium diet, H324
supply-consumption balance, hypoxia, L-thyroxine-induced cardiac hypertrophy, H374
transport
polycythemia effects, newborn, H830
working gracilis muscle, H120

Oxypurine, salvage, myocardial ischemia, H37

P

Pacing, pulsus alternans and, H245
 Palmitate, oxidation, heart cells, neonate, H389
 Pantothenate kinase, coenzyme A synthesis, heart, H532
 Pantothenic acid, coenzyme A synthesis and, heart, H532
 Papaverine, anoxia, capillary filtration coefficient and, H312
 Parasympathetic control, heart rate, awake state, H168
 Parasympathetic nerves, vagal stimulation, heart rate and, H585
 Pentobarbital, anesthesia, carotid sinus reflex and, H696
 Peptides, vasoactive intestinal, pulmonary vascular effects, newborn, awake state (lamb), H716
 Permeability
 capillary, plasma and red blood cell effects, hindlimb, H818
 water, plasma and red blood cell effects, hindlimb, H818
 pH
 decrease, ischemia-induced, myocardium, H652
 penetrating arterioles, cerebral cortex, H380
 transmural gradient, myocardial ischemia, H232
 Phenoxylbenzamine, smooth muscle tone changes, aortic impedance and, H1
 Phenolamine
 cardiac and aortic smooth muscle reactivity, isoproterenol, H369
 norepinephrine release and, cardiac, H283
 Phenylephrine, renal nerve activity, H851
 Phosphatidylcholine liposomes, protein kinase injection, heart cells (chick), H630
 Plasma
 catecholamines: *see* Catecholamines
 constituents: *see* specific constituent
 pharmacokinetics, macromolecules, tissue, H129
 vasopressin: *see* Vasopressin
 volume: *see* Volume
 water permeability and, hindlimb, H818
 Platelet-activating factor, coronary circulation and (pig), H466
 Platelets
 depressed reticuloendothelial clearance, after trauma, H180
 pulmonary hypertension, monocrotaline pyrrole-induced, H747
 Polarography, cardiac output measurement, adult and newborn (dog, piglet), H733
 Polycythemia, vascular volume and, newborn, H830
 Positive end-expiratory pressure: *see* Pressure
 Potassium, activation, chronic smoking, arteries, H97
 Potassium chloride, depolarization, arterial smooth muscle, H306
 Potentials
 action
 cardiac muscle, aging effects, H784
 slow response, cardiac hypertrophy, H675

transmembrane, cardiac Purkinje fibers, fetal, H250
 transmural direct current, coronary artery occlusion and (pig), H475
 Prazosin, renal hypertension, renin level and, H573
 Pregnancy: *see also* Fetus
 uterine blood flow, exercise effects (goat), H207
 Preload
 endotoxin effects, hepatic venous responsiveness, anesthesia, H658
 pressure-flow relations and, H410
 stroke volume, beat-to-beat determinants, H435
 Pressor hormones, blood pressure maintenance and, H25
 Pressors, epinephrine infusion and, awake state, H683
 Pressure: *see also* Blood pressure
 arterial
 cerebrospinal fluid collection, cisterna magna catheter, awake state, H551
 pressor hormone effects, H25
 capillary
 polycythemia effects, newborn, H830
 skeletal muscle, H880
 central venous, baroreflex regulation, vascular resistance, H74
 dependence, smooth muscle changes and, H1
 diastolic, left ventricular, preload effects, H410
 intracardiac and arterial, plasma vasopressin and, H647
 intramyocardial, capacitance and (pig), H525
 positive end-expiratory
 cardiovascular response to, H114
 dimensional analysis of left ventricle, H792
 subvalvular gradients, aortic stenosis, H542
 venous, elevation, renal artery, anesthesia, H702
 venous occlusion, skeletal muscle, H880
 zero-flow, preload effects, H410
 Pressure-flow relations
 capacitance-free diastolic, preload effects, H410
 cessation of arterial and venous flow, capacitance effects (pig), H525
 renal, anesthesia and, H702
 Pressure-volume relations
 oxygen consumption and, abnormal contractions, heart, H154
 right and left ventricular, response to positive end-expiratory pressure, H114
 Propranolol
 capillary density and, heart, H189
 histamine and, extravascular lung water, H69
 Propylene glycol, chloralose and, carotid sinus reflex under anesthesia and, H696
 Prostaglandins, monooxygenase and, ductus arteriosus (lamb), H640
 Protein
 characterization, myocardial cytoskeleton, H566
 gap junctional, heart, components of, H865
 phosphorylation, adenosine and calcium effects, heart, H559
 Protein kinase, inhibitors, myocardial slow

channel blockade (chick), H630
 Pulmonary artery, viscoelastic properties, H90
 Pulsus alternans, postextrasystolic, heart rate and, H245
 Pump, sodium, ouabain effects, fetus, H213
 Purine, accelerated salvage, myocardial, H37
 Purkinje fibers, cardiac, fetal, H250
 Pyruvate dehydrogenase, complex, ischemic heart, H858

R

Receptors
 α_1 -adrenoceptor, renal hypertension, H573
 androgen and glucocorticoid, exercise-induced hypertrophy, H761
 baroreceptors
 aortic, deafferentation, DOCA-salt hypertension, H448
 aortic, rapid resetting of nerves, awake state, H302
 aortic, renal hypertension and, H720
 control, sinoatrial rate and atrioventricular conduction, H149
 reflex control, plasma vasopressin, H647
 cardiac
 osmolality-vasopressin relations, plasma, H360
 ouabain-induced reflex coronary vasodilation, H664
 β -receptors and adenylate cyclase, norepinephrine effects, myocardium, H31
 vascular angiotensin II, angiotensin II and deoxycorticosterone infusion effects, H608
 Red blood cells: *see* Erythrocytes
 Reflexes
 arterial baroreceptor, anesthesia and, H696
 baroreflex
 angiotensin and, heart rate and sympathetic activity, H80
 aortic, sustained interruption, H319
 arterial, renal hypertension effects, H720
 carotid and aortic, renal nerve activity and, H851
 carotid sinus, anesthesia and, H696
 renal nerves, hypertension, H843
 reversal, renal hypertension, H261
 sensitivity, DOCA-salt hypertension, H448
 vascular resistance during blood volume expansion, H74
 cardiac, osmolality-vasopressin relations, plasma, H360
 cardiovascular, circulating blood volume, awake state, H579
 carotid sinus, thiamylal effects, H806
 changes, smooth muscle tone, aortic impedance and, H1
 control, plasma vasopressin, H647
 coronary vasodilation, ouabain-induced, cardiac receptors and, H664
 smoke, renal hypertension, H261
 Renal artery, pressure-flow relations, anesthesia and, H702
 Renal nerve
 activity, carotid and aortic baroreflex control, H851
 hypertension, baroreflex control, H843

- Renin
blood pressure and, normal hydration, H143
level, renal hypertension, α_1 -adrenoceptor blockade in, H573
osmolality, cardiac receptors and, H360
- Renin-angiotensin system
blood pressure regulation, H404
circulation and, limb, H239
- Resistance
pulmonary vascular
effect on right ventricular systolic performance, H339
vasoactive intestinal peptides and, newborn, awake state (lamb), H716
renal vascular, vasoconstriction during hemorrhagic hypotension, awake state, H671
total peripheral, β -adrenergic vascular control in hemorrhage, H351
vascular
anoxia and capillary filtration coefficient, H312
baroreflex regulation, blood volume expansion, H74
peripheral, pressor hormones and, H25
- Respiratory acidosis: *see* Acidosis
- Respiratory regulation, working gracilis muscle, H120
- Reticuloendothelial clearance: *see* Clearance
- Ribose, accelerated purine salvage, myocardial ischemia, H37
- S**
- Septal artery, hypertrophy, coronary and collateral circulation, H768
- Shock
circulatory, hepatic venous responsiveness, anesthesia, H658
hemorrhagic, plasma arginine vasopressin in, H168
septic, cardiopulmonary response to bacteremia, H344
- Sinoatrial node, vagal stimulation effects, heart rate and, H585
- Sinoatrial rate, atrioventricular conduction and, baroreceptor control of, H149
- Smoking, chronic, arteries and, H97
- Sodium
calcium-dependent force, unstimulated cardiac muscle, H222
depletion, vascular angiotensin II receptors and, H608
excretion, polycythemia effects, newborn, H830
- Sodium chloride, cerebrospinal fluid collection, cisternal magna catheter, awake state, H551
- Sodium fluorescein, macromolecule transport, tissue, H129
- Sodium-potassium-ATPase, ouabain effects, premature fetal heart, H213
- Sodium pump: *see* Pump
- Spatial reconstructor, dynamic, left ventricular myocardial mass, H138
- Spinal cord, thoracic, intracardiac bradykinin and, H500
- Spinoreticular cells, response, intracardiac bradykinin, H500
- Spinohthalamic cells, responses, intracardiac bradykinin, H500
- Spleen, platelets, depressed reticuloendothelial clearance, after trauma, H180
- Streptozotocin, diabetes, insulin therapy, cardiac function and, H453
- Stroke volume: *see* Volume
- Substrates
exogenous, uptake, graded muscle stimulation and, H690
oxidation, heart cells, neonate, H389
- Sucrose gradient, centrifugation, heart, H483
- Superoxide, free-radical generation, myocardial alterations due to, H776
- Swimming: *see* Exercise
- Sympathectomy, A5 cell stimulation, cardiovascular effects, H44
- Sympathetic afferents, response, intracardiac bradykinin, H500
- Sympathetic nerves
activity
baroreflex control, angiotensin and, H80
renal hypertension and, H720
renal hypertension, renin levels and, H573
cardiac, sinoatrial rate and atrioventricular conduction, H149
lumbar activity, baroreflex control, angiotensin and, H80
- Sympathetic stimulation, norepinephrine release, cardiac, H283
- Sympathetic withdrawal, ouabain, coronary circulation and, H664
- Systolic performance, right ventricular, pulmonary vascular resistance effects, H339
- T**
- Tachycardia, atropine and, awake state, H168
- Temperature
activation curve, enzyme activity, heart, H483
intracardiac, thermocouple amplifiers, H626
- Testosterone, cardiac hypertrophy, exercise-induced, H761
- Tetrodotoxin, cardiac Purkinje fibers, fetal, H250
- Thalamus, response, intracardiac bradykinin, H500
- Thermodilution, cardiac output measurement, limitations of, H754
- Thiamylal, carotid occlusion, mild hemorrhage and, H806
- Thrombocytopenia, pulmonary hypertension and, monocrotaline pyrrole-induced, H747
- Thrombosis, platelet clearance, after trauma, H180
- Thyrototoxicosis, oxygen supply-consumption balance, cardiac hypertrophy, H374
- L-Thyroxine, cardiac hypertrophy, oxygen supply and, hypoxia, H374
- Tissue: *see also* specific type
macromolecule transport, capillary bed, H129
- U**
- Urethan, anesthesia, carotid sinus reflex and, H696
- Uterus, blood flow: *see* Blood flow
- V**
- Vagal stimulation, heart rate and, H585
- Vagotomy
left cervical, sustained interruption of aortic baroreflex, H319
occlusive summation, renal nerve activity, H851
- Vagus nerve, tachycardia, antimuscarinic agents and, awake state, H168
- Vascular bed, renal and mesenteric, leukotriene effects, H518
- Vascular waterfall, pressure-flow relations, H525
- Vasoconstriction
coronary, platelet-activating factor and (pig), H466
microvascular alterations, renal hypertension, H728
renal, during hemorrhagic hypotension, awake state, H671
- Vasoconstrictors, adrenal insufficiency, H104
- Vasodilation, coronary, ouabain-induced, cardiac receptors and, H664
- Vasodilators, coronary, adenosine transporters (guinea pig), H710
- Vasopressin
arginine
blood pressure maintenance and, H25
vascular effects, adrenal insufficiency, H104
blood pressure and, normal hydration, H143
plasma, reflex control of, H647
plasma arginine, hemorrhagic shock, H174
- Verapamil, cardiac Purkinje fibers, fetal, H250
- Viscoelasticity, pulmonary arteries, H90
- Volume
plasma, β -adrenergic vascular control in hemorrhage, H351
stroke
 β -adrenergic vascular control in hemorrhage, H351
mechanical determinants of change, H435
vascular, polycythemia effects, newborn, H830
- W**
- Wall-to-lumen ratio, renal hypertension and, H728
